9/1/2001 (10 yrs)	Eastern Massasauga Rattlesnake WI DNR CCAA	1 candidate species: Eastern Massasauga (=rattlesnake) (<i>Sistrurus catenatus catenatus</i>)	WI	13,041 acres

* Conservation efforts resulted in not having to identify this species as a candidate for listing.

** Conservation efforts resulted in removing both species from candidate status; a listing proposal is no longer necessary.

*** Programmatic Candidate Conservation Agreement with Assurances (CCAA). An organization or agency holds the 'master' or 'umbrella' permit and enrolls non-federal property owners and extends the incidental take authorization and assurances to them through a "certificate of inclusion" based on their voluntary agreement to manage their property in a manner consistent with the CCAA.

Summary: 23 CCAAs in 16 states have more than 1 million acres enrolled by 59 landowners and cover 40 species, including 17 that were candidates when the CCAA was adopted. 10 are programmatic agreements.
